

Product information

Inductive probe Millimar EHE-2056

Product features

- For ease of positioning the measuring tip mounted to the coupling can be tilted by 280°.
- When positioning the measuring tip within a range of up to 20° the cosine error in the measuring signal is corrected automatically.

Application

For use on test stands, surface plate work, or where light pressure is needed

Item no.: 2120422

Technical data

Measuring range from	-0.25
Measuring range up to	0.25
Measuring range from	-0.01
Measuring range up to	0.01
Measuring force (N)	0,04 N (.14 oz.) in either direction
Increase in measuring force	0,001 N / 25µm
Repeatability fw (µm)	0.1
Repeatability fw (inches)	4.0000 uinch
Cable length	1.2
Compatibility	Federal

Dimensions
