

# Product information

## Dimensionair air gages (single master system) Millimar D-1250M

### Product features

- Operated with regular workshop compressed air (40-125 psi)
- An internal pressure regulator keeps the measuring pressure within the calibrated range
- Zero offset of the instrument with just one setting standard and the zero adjuster
- Clear display with fine dial graduation and needle thin pointer gives an accurate, reliable readout
- An integrated air filter removes dust and dirt particles from the air supply
- Equipment connection on the front of the device; hand tightening is sufficient for tight connections
- No recalibration required after changing the measuring equipment; measurement can be resumed immediately after setting the instrument to zero
- 4 models available, choice of mm or inches

Item no.: **2095190**

### Technical data

<b>Range of analog display <math>\mu\text{m}</math></b>	$\pm 76$
<b>Graduation mm</b>	2
<b>Display</b>	Large analog scale with 2 tolerance markers
<b>Scale reading</b>	Dial diameter 82.6 mm / 3.25"
<b>Compatibility</b>	Federal
<b>Features</b>	1

### Package contains

adapter for pneumatic plug gages, Federal compatible, air filter, supply hose AHO-2

### Accessories

Order no.	Designation	Product type
2201992	Replacement filter element for AFL-10 filter	AFL-21
2201993	Replacement filter element for AFL-24 filter	AFL-23
