Product information

USB connecting module Millimar N 1701 USB

Product features
- Flexibel combination of RS-485-bus-modules
- Capable modules for the evaluation of measurings sensors
- Synchronous data enquiry of multiple connected sensors
- Ability to connect the N 1700 modules to the smart & universally applicable Millimar Cockpit Software
- Connection of all types of measuring sensors within the same compatibility
- Modular and customizable selection of product combinations for solving each customer specific measuring tasks
- Theoretical bus data rate of max. 4189 values per second (depending on the number of connected channels)

Package contains
end module, instruction manual, USB cable

Application
Smart and flexible combination of measuring modules and software for solving customer-specific measuring tasks.

Item no.: **5331130**

Technical data

Current supply	430
Configuration	Millimar Cockpit Software
Data interface	USB, RS-485
Operating temperature from	0
Operating temperature up to	40

Accessories

Order no.	Designation	Product type
4102058	Foot switch to trigger data transmission	16 ESf
