

Informations produit

Jauge d'épaisseur Marameter 57B-13

Propriétés du produit

- Using the basic design of Model 57B-13, the lower contact is PT-103, 1.10 mm / .043" diameter rod, mounted horizontally
- Upper contact is a flat chisel contact , in line with the rod
- By slipping tubular parts onto the lower contact, the gage can measure the wall thickness of the tube
- An auxiliary weight on the indicator provides a total dead weight load of 25 grams
- Digital indicator includes integrated wireless transmitter

Référence : 2050980

Contenu de la livraison

Appareil d'affichage compris

Application

- For checking wall thickness of wire insulation and other small diameter tubular parts

Caractéristiques techniques

Étendue de mesure inch	0 - 0,30"
Profondeur de l'étrier mm	102
Valeur de la division d'échelle inch	0,0005"
Force de mesure	0.25
